                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 2, Application US/08302832

Patent No. 560938

GENERAL INFORMATION:
APPLICANT: Barentamp, Stephen J
TITLE OF INVENTION: High Molecular Weight Surface Proteins
TITLE OF INVENTION: Of No. 5603938-Typeable Haemophilus
NUMBER OF SEQUENCES: 8
CORRESPONDENCES: 8
CORRESPONDENCES: 8
ADDRESSE: Shoemaker and Mattare, Ltd.
STREET: 2001 Jefferson Davis Hwy., 1203 Crystal Plaza
STREET: Bldg. 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Query Match

Outer membrane protein A precursor (190 kDa antigen) (Cell surface
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Anderson B.E., McDonald G.A., Jones D.C., Regnery R.L.;

"A protective protein antigen of Rickettsia rickettsii has tandemly repeated, near-identical sequences.";

Infect. Immun. 58.2760-2769(1990).

-: FUNCTION: ELICITS PROTECTIVE IMMUNITY.

-: SUBCELLULAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED BY A STAYER WITH HEXAGONAL SYMMETRY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     13 X APPROXIMATE TANDEM REPEATS.

Outer membrane protein B precursor (168 Kba surface-layer protein)
(Surface protein antigen) (Cell surface antigen 5) (Sca5) (rOmpB)
(rOmp B) [Contains: 120 Kba surface-exposed protein (Surface protein antigen) (120 kba outer membrane protein ompB); 32 kba beta peptide].

OUTER membrane protein B precursor (168 kbs surface-layer protein)

(Surface protein antigen) (Cell surface antigen 5) (Sca5) (rOmpB)

(rOmp B) (Contains: 120 kbs surface-exposed protein (Surface protein antigen) (120 kbs outer membrane protein ompB); 32 kbs beta peptide).

OMPB OR RC1085.
